

# SENIOR FULL STACK DEVELOPER

## SUMMARY

Highly skilled and motivated Full Stack Developer with over 5 years of experience in designing, developing, and managing complex web applications and improving web functionality. Currently enhancing business solutions at SocialPie Technologies, specializing in React.js, Tailwind CSS, Node.js, TypeScript, and MongoDB.

## EXPERIENCE

### March 2021 - PRESENT

Lucerna Tech

#### Full Stack Developer

- Spearheaded the development of high-performance web applications using React.js and TypeScript, emphasizing smooth, responsive user interfaces.
- Led a team in implementing Tailwind CSS for stylistic, modern, and functional front-end designs.
- Enhanced application performance and scalability by optimizing Node.js back-end processes and MongoDB database interactions.
- Collaborated closely with cross-functional teams to troubleshoot and debug issues during the delivery of reliable solutions.
- Regularly updated and integrated new technologies and frameworks to improve development processes and application efficiency.

### Feb 2018-Feb 2021

SalSoft Technologies

#### Mern Stack Developer

- Developed and maintained scalable web applications using MongoDB, Express.js, React.js, and Node.js, focusing on end-to-end service delivery.
- Designed RESTful APIs and ensured cross-platform optimization and responsiveness, contributing to a seamless user experience across devices.
- Worked with graphic designers and front-end developers to implement web design features using CSS and JavaScript, including Tailwind CSS adaptations for projects requiring lightweight and custom styles.
- Drove the development of complex back-end functionalities while maintaining a user-focused approach to application design and usability.

## SKILLS

- **Front-End:** React.js, TypeScript, Tailwind CSS, HTML, CSS
- **Back-End:** Node.js, Express.js, REST APIs, Strapi
- **Database Management:** MongoDB
- **Tools & Technologies:** Git, React Query, React Recoil, AWS
- **Others:** Redux.js, Git, CI/CD practices

## EDUCATION

2014 - 2017 | Bachelor of Computer Science

## LANGUAGES

- English (Professional)
- Urdu (Native)

## PROJECTS

### BeMe - Your Innovative Mental Health Platform

Developed a user-friendly platform for connecting patients with top-tier mental health practitioners, emphasizing easy consultation booking and personalized health goals tracking.

### CrazyCoupons

Created a comprehensive platform for shoppers to find the best deals, integrating features for a budget-friendly shopping experience with digital subscriptions.

### Phantom-Connection

Led the development of a secure interface for managing digital assets on the Solana blockchain, utilizing React.js with TypeScript and integrating Solana's Web3.js.

### Weather App

As the Full-Stack Developer, I developed a real-time weather application using Node.js and Express.js. I integrated the OpenWeatherMap API to fetch weather data and used EJS for dynamic HTML content rendering, focusing on a responsive user interface.

### SocialDevApp

Spearheaded the full-stack development of a LinkedIn-like platform for developers using Node.js, Express.js, and React.js. Designed and implemented the entire backend infrastructure and RESTful API, ensuring seamless data flow and robust functionality.

### E-commerce-App

Led the backend development of an e-commerce platform using the MERN stack, focusing on a single-vendor model. Built and managed RESTful APIs for product listing and purchasing functionalities, enhancing the user and admin experience.

### Live Session App

Developed a platform integrating Zoom services for live educational sessions, employing React.js for the front end. Focused on creating a user-friendly interface for course creation and purchase, contributing to an effective learning management system.
